

OUR QUALITY POLICY ISO 9001 EN 9100

Dear Customer,

SSE has always operated in the aerospace, defence and security sectors, where quality, reliability and technical excellence are essential elements. Our priority is to ensure products and services that meet the highest industry requirements, guaranteeing business continuity, information security and proactive risk management.

We design and deliver our solutions in full compliance with your requirements, applicable regulations and relevant technical standards. We support you from the earliest stages of your projects, contributing to the definition of specifications and the assessment of the most suitable solutions.

Your requirements become our quality objectives. All SSE personnel are involved, trained and accountable for achieving them, through an approach focused on collaboration and continuous improvement.

We have adopted an Integrated Management System compliant with ISO 9001 and EN 9100 standards, which we use as a tool to:

- continuously monitor and improve our processes through meaningful performance indicators;
- develop and maintain the technical competencies of our personnel;
- ensure process reliability and product conformity;
- provide adequate, secure and up-to-date infrastructure;
- manage risks and opportunities in a structured manner, ensuring business continuity and information security.

Our commitment is to provide you with reliable, timely and compliant solutions, supporting you throughout the entire project life cycle.

We thank you for the trust you continue to place in SSE and in our team.

The Management
